Global Electronic Components & Semiconductor
Supply Chain Solutions

About PIONEX Technologies Private Limited

PIONEX Technologies Private Limited is a global B2B supply chain solutions provider focused on optimizing electronics supply chains — from component sourcing and engineering support to distribution and final delivery. By working closely with trusted international manufacturers, we deliver reliable, high-quality, and cost-effective electronic components that power innovation across industries.

With deep domain expertise and a strong global sourcing network, PIONEX supports customers throughout the product lifecycle — from early design and prototyping to mass production, even in complex and supply-constrained environments.

Global sourcing

Lifecycle support

Trusted partnerships

**Our
Mission**

To be a globally recognized leader in electronic component distribution, known for quality, integrity, and agility.

**Our
Vision**

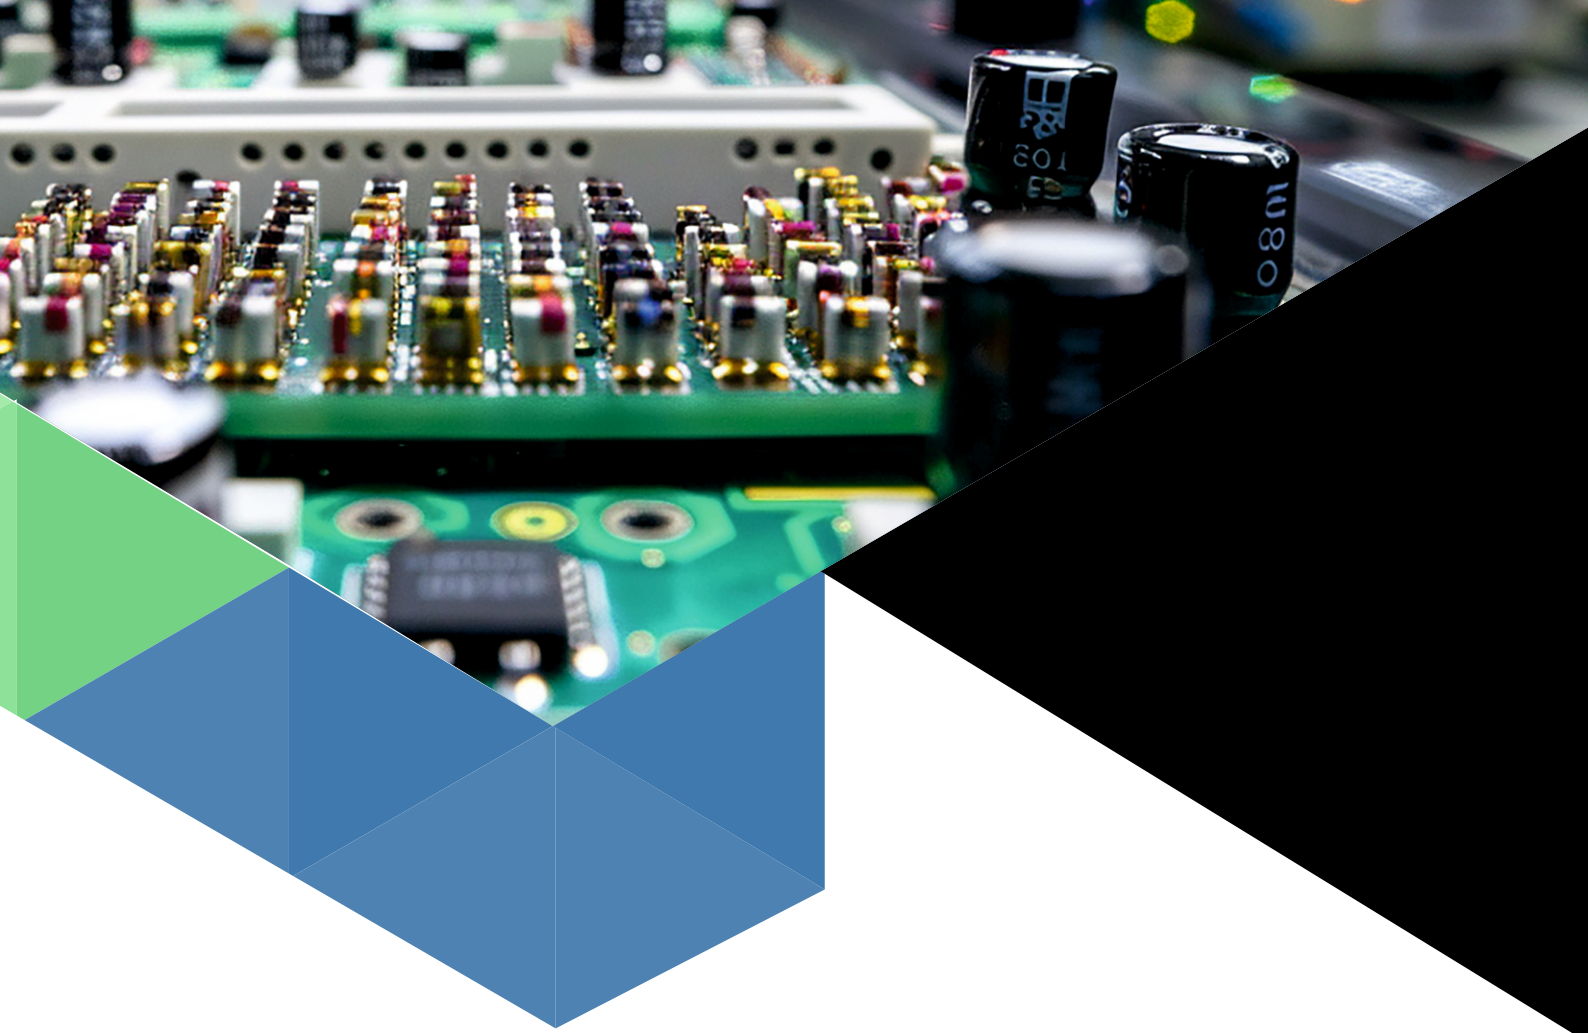

To become the most trusted partner in the global electronics supply chain by enabling innovation, ensuring reliability, and delivering

**Our
Commitment**

We are committed to quality, transparency, ethical sourcing, and long-term partnerships that support customer success.

Why Choose Pionex

Authorized & Trusted Sourcing	End-to-End Engineering Support	Strong Global Supply Chain Management	Application-Focused Technical Expertise
Flexible Commercial Models	Broad Product & Brand Portfolio	Customer-Driven Service Model	On-Time & JIT Deliveries

Certificate

Engineering

Supply chain

Application

Commercial

Portfolio

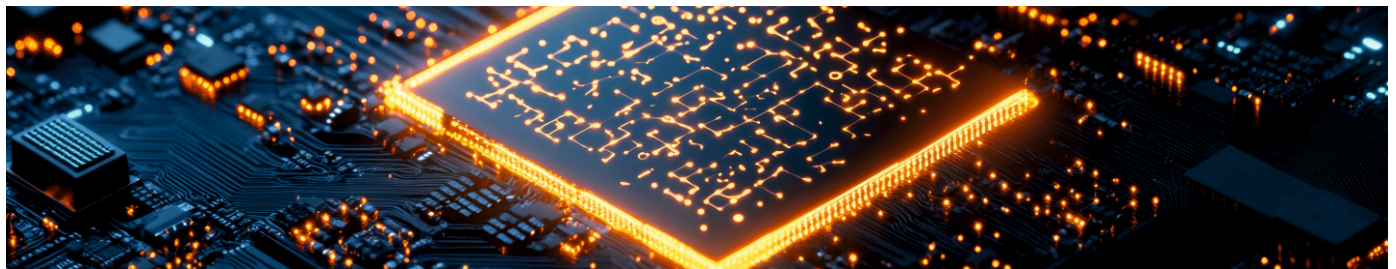

Customer

Delivery

We offer a comprehensive portfolio of active and passive electronic components from globally trusted manufacturers.

Passive Components	Discrete Semiconductors	Integrated Circuits (Ics)	RF & Wireless Components
Power Components	Optoelectronics	Electromechanical Components	Development Tools
 Passive	 Discrete	 Ics	 RF
 Power	 Opto	 Electromech	 Dev tools

Our value-added services ensure supply continuity, quality assurance, and optimized procurement.

Global Component Sourcing	Obsolete & Hard-to-Find Parts	BOM Kitting & Fulfillment	Competitive Pricing
Quality Inspection & Testing	Logistics & Delivery Solutions	OEM & EMS Support	80+ Supplier Lines
 Sourcing	 Obsolete	 Kitting	 Affordable
 Inspection	 Logistics	 OEM/EMS	 Supplier Chain

Industries We Serve (overview)

Our value-added services ensure supply continuity, quality assurance, and optimized procurement.

Our Line Cards

Automotive Industry

Semiconductor components used in the automotive industry include **ECUs, microcontrollers, sensors, power devices (MOSFETs/IGBTs), and memory chips** to support engine control, safety systems, infotainment, and electric vehicles.

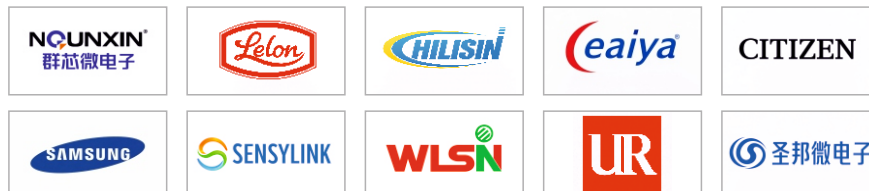

Communication Modules

Semiconductor components used in communication modules include **RF chips, baseband processors, microcontrollers, power management ICs, and memory** to enable wireless connectivity and data transmission

Data Centre

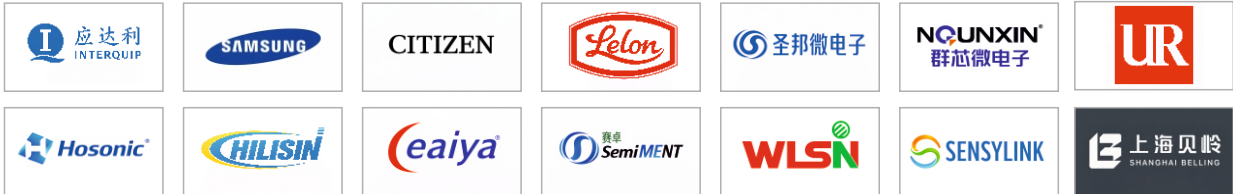

Semiconductor components used in data centers include **processors (CPUs/GPUs), memory chips, power management ICs, networking chips, and storage controllers** to ensure high-speed processing, efficient power use, and reliable data handling.

Electricals

Semiconductors such as diodes, transistors, rectifiers, MOSFETs, IGBTs, and voltage regulators are used to control power flow, switching, and protection in electrical systems.

Home Appliances

Semiconductors in home appliances control operations, improve energy efficiency, and enable smart features.

Industrial Control

Semiconductors in industrial control enable automation, monitoring, and precise control through processors, power devices, sensors, and communication chips.

Industrial Power Supplies

Semiconductors in home appliances manage operations, boost energy efficiency, and enable smart features.

New Energy

Semiconductors in new energy systems enable efficient energy generation, storage, and conversion.

Smart Wear

Semiconductors in smart wear enable compact, energy-efficient, and connected wearable devices.

Telecommunications

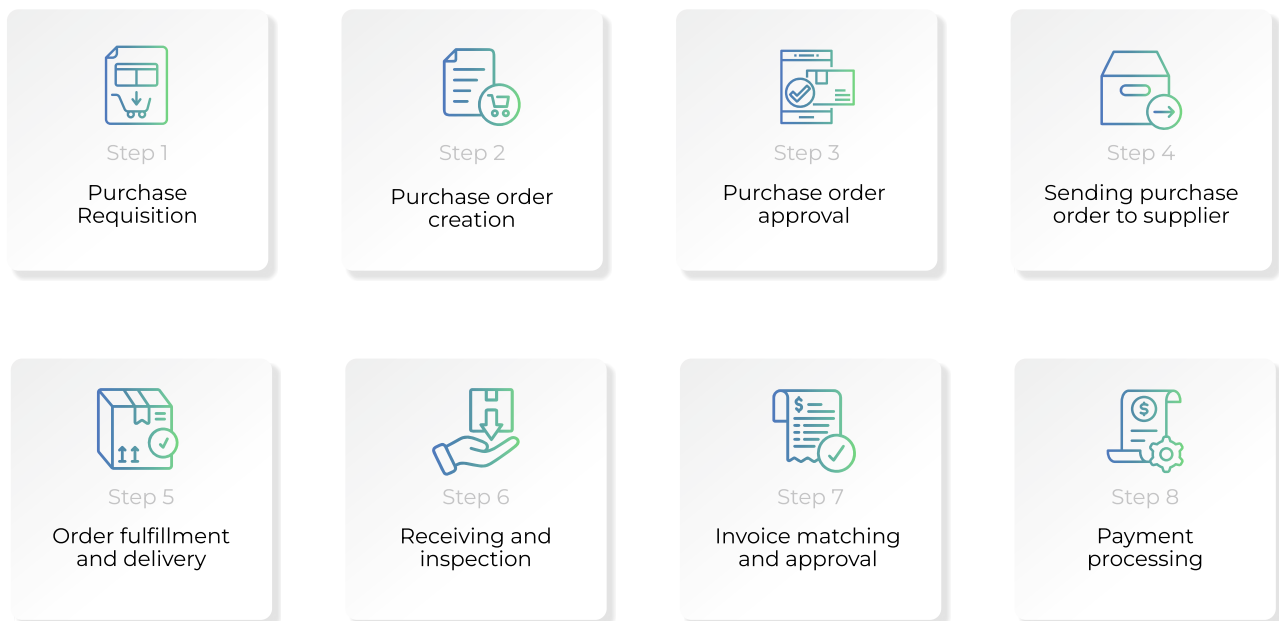

Semiconductors in telecommunications enable high-speed signal transmission and reliable network connectivity.

Semi Conductor Ecosystem

Order to Delivery Process

Cooperative Customers Globally

Leading Consumer Companies in India Relying on Semiconductor Components

Your trusted partner
in global electronics supply chains.
